

POLYFINTECH API Hackathon

18th April 2019

OVERVIEW

TEA and its associated partners will organize a workshop for students participating in the POLYFINTECH API Hackathon.

GOALS

1. Introduce students to blockchain concepts and how to design a blockchain project
2. Introduce students to tools and resources to assist in their hackathon
3. Short tour of Justco coworking space

Instructor - Ernie Teo

Dr. Ernie Teo, Research Scientist at IBM, is an economist by training and academic background who applies the practice of social science to the field of technology. At IBM, Teo is a team member at the Center for Blockchain Innovation, a collaboration with the Singapore Economic Development Board (EDB) and the Monetary Authority of Singapore (MAS) for the development of applications and solutions that are based on enterprise blockchain, cyber-security, and cognitive computing

technologies. Prior to his role at IBM, Teo was a Research Fellow at Singapore Management University (SMU), an Assistant Professor at Nanyang Technological University, and an Associate Lecturer at UNSW in Sydney Australia. Most recently at SMU, Teo's research focused on emerging trends in the arenas of digital currency, financial technology, and socioeconomic inclusion, with focus paid to the advancement of the academic literature on the subjects of microeconomic theory and applied game theory within these three arenas.
